

# 可退式打捞筒 Releasing and Circulating Overshot

可退式卡瓦打捞筒是抓捞井内光滑外径落鱼的最有效工具，如钻铤、钻杆、接头、接箍、油管、随钻工具和测试仪器等，能承受大载荷，设计有落鱼密封结构，能高压循环，也可以在井内释放落鱼，带有铣鞋，用于修整落鱼的飞边破口，使落鱼顺利进行捞筒。附件有加长节、壁钩、加大引鞋等。每套卡瓦打捞筒配有螺旋卡瓦和篮状卡瓦。螺旋卡瓦用于落鱼直径接近打捞筒的最大打捞尺寸，篮状卡瓦用于落鱼直径远小于打捞筒的最大打捞尺寸。

Releasing and reversing overshot is the most effective tools for grappling fish from the borehole smooth diameter. Such as drill collar, drill pipe, joint,coupling,tubing,drilling tools and testing instruments,etc.,can bear big load,design the fish sealing structure, can high pump pressure circulation,also can release the fish in borehole,with milling shoers,used for dressing on flash crevasse,make the fish go smoothly bailer,attachment have extension,wall hook,increase the guide shoe and so on.Each grapple is equipped with soiral grapple and blue grapple.The spiral grapple is used to the fish diameter is near the maximum catch size. The basket grapple is used to the fish diameter is substantially less than maximum catch size.

## 规格 Specifications

型号 TYPE	外径 O. D. (mm)	接头螺纹 THREAD CONNECTION	最大打捞尺寸 (mm) Max. Catch size 螺旋卡瓦 Spiral Grapple	最大打捞尺寸 (mm) Max. catch size 篮状卡瓦 Basket Grapple
