

# H 型安全接头    H Type Safety Joint

H 型安全接头可以在井下管柱所需部位，能承受作业中的各种拉、压载荷并传递扭矩。需要时，在安全接头处容易卸开，并取出上部管柱。再次下钻时，也容易对接上，继续进行作业。

H type safety joint installed on the position required for subsurface drill stem and can bear in fishing operation all kinds of loads for pulling, pressing and used to transmit torque. When it is necessary, the safety joint can be easy to discharge off to take out the drill stem above it. It is easy to connect the safety joint to ensure a continuous fishing operation when running in hole again.

## 规格 Specifications

型号 Type	外径 (mm) O.D.	内径 (mm) I.D	螺纹接头 Connect
HAJ121	121	54	NC38
HAJ159	159	57	NC50
HAJ165	165	57	NC50
HAJ178	178	80	5—1/2 FH
HAJ203	203	71	6—5/8REG
